

FAN and *"E-X-T-R-E-M-E"* Cooler FAN/SHROUD TWO-SPEED FAN CONTROL KIT

**CONTROLS INCLUDE: "DUAL" 40-AMP RELAYS;
THERMOSTAT with DUAL CONTROLS; DUAL FUSES
and WIRING HARNESS with A/C HOOKUP!**

[A/C override turns on fan when A/C clutch is engaged.]

(For 2-Speed Fans & 2-Speed Single or "Dual" 2-Speed Fan/Shrouds)

This particular Fan Control Kit, with thermostat settings of 185 and 195 degrees, was featured at the Las Vegas SEMA Show in 2011 and was an instant hit! Even among the most notable of street-rod retailers and suppliers, it has been in high demand ever since!

This Dual Therm was "made for" such a 17" 2-Speed Fan or Fan/Shroud Assembly such as our trademarked *"E-X-T-R-E-M-E" Coolers*, and its sensor-type probe goes into the fins of the radiator. Overall, this Dual Therm simplifies what could be a more complex or involved 2-Speed hookup! Complete wiring instructions/diagram come with every Fan Control Kit.

*Per the chief engineer who designed these fans, which are contained in our "E-X-T-R-E-M-E" Cooler Fan/Shroud Assemblies, these 17" 2-Speeds use only 50 Amps. However, 70 Amps are needed should there be any possible random spike at start-up. These Fan Controls with their DUAL 40-Amp Relays will more than take care of such a situation, leaving you with some extra ampage as well. ***You can't go wrong with these Fan Control Kits!!!****

OUR COMPETITION Gets up to: *\$85.00 - \$89.00*

OUR PRICE: *\$59.00 !!!*
